<b>Certification Exam for Structural Integration</b>	<b>Ethics and Professional Issues</b>  <b>Sample Question</b>
<b>Ethics and Professional Issues</b>  Sample Question	<p>After 5 Structural Integration sessions with a client with thoracic outlet syndrome, you happen to meet the doctor who referred the client at the grocery store. The doctor asks how the client is doing. The most appropriate response would be to tell the doctor:</p> <ul style="list-style-type: none"> <li>a. why Structural Integration is an effective means for resolving thoracic outlet syndrome.</li> <li>b. to refer to the initial evaluation that you sent.</li> <li>c. how the client is doing and that you are half way through your work with the client.</li> <li>d. that you appreciate the referral and welcome the doctor to call you to discuss this case.</li> </ul> <p><i>Relating information about a client such as diagnosis or treatment in a public setting violates the practitioner's duty to protect client confidentiality. Answer (d) is a professional way to acknowledge the referral without disclosing confidential information and is, therefore, the best answer.</i></p>
